

Project Consulting in Pharma and Biotech

ASPIRAS wishes you a lot of success in summer 2006! What's new in July 2006?

Rhineland Innovation Park

--- This Theme is not handled by ASPIRAS any longer. ---

From July onwards ASPIRAS will help to market an industrial area in Grafschaft-Ringen, Innovationspark Rheinland (IPR) (www.innovationspark-rheinland.de) close to Bonn and in the middle of Europe. IPR is located in the county of Ahrweiler where ASPIRAS was already successful with the management of the innovation center in Sinzig (IGZ Sinzig). More info on this project can be found in the last newsletter.
In Grafschaft we will focus on the acquisition of companies from the life sciences and innovation sector which should at least be 50 % of the users of the park. We will make use of our large network in this area for completing this new task.

ASPIRAS Live!

On our website we have now added more information on our social activities, mainly in supporting young people in their education and professional orientation. On the one hand we are coaching young females interested in natural sciences. On the other hand we are coaching students in diploma projects. Have a look at these activities at ASPIRAS Live! (<http://www.aspiras.de/en/seiten/aspiras-live/live.html>).

Medical scientific and pharmacovigilance services

Since the launch of their first product in the German market we are supporting Mitsubishi Pharma Deutschland, the German subsidiary of the globally active Mitsubishi Pharma, in the areas of medical scientific and pharmacovigilance services regarding this highly ethical hospital product. You will find more reference projects at <http://www.aspiras.de/en/seiten/kundenprofil.html>.

Corporate Social Responsibility

We are interested in business ethics. Therefore we are in discussions with the Europäische Akademie Bad Neuenahr-Ahrweiler (<http://www.europaeische->

akademie-aw.de/) and a dedicated consultant from Hamburg, Christina Dieckmann, to develop new concepts in this context. If you would like to contribute please don't hesitate to contact us at pauly@aspiras.de.

Electronic Business Card

To make retrieval of our contact data easier we have included an electronic business card into our website. The card can be found in the contact area at <http://www.aspiras.de/en/seiten/kontakt.html>.

Nanobionet

For a year now Cathrin Pauly is one of the members of the board of Nanobionet e. V. (www.nanobionet.de), an association active in the field of nanotechnology and nanobiotechnology. This engagement of ASPIRAS is favourable for our clients because they can participate in professional cooperations and can take advantage of technology transfer from academia to industry from a very early stage onwards. Please do not hesitate to contact us at pauly@aspiras.de regarding nanobiotech issues.

Take a break!

On the recreational site of ASPIRAS a new photograph and a new citation will enhance your creativity <http://www.aspiras.de/en/seiten/break.html>.

Challenge us

Just contact us non-committally and tell us your problem. Based on a sound analysis ASPIRAS offers you a coarse concept including a cost estimation. After consultation with the client it provides the following services: project target identification, project planning regarding time, capacity, cost and manpower, project implementation and control and project documentation. ASPIRAS finalises projects effectively and in the agreed upon time frame. Please contact Cathrin Pauly, pauly@aspiras.de.
